## Post-Classical Archaeologies / Studies

### EDITORS

**Gian Pietro Brogiolo** (chief editor)

**Alexandra Chavarria Arnau** (executive editor)

The monograph series of PCA offers a platform for extensive contributions on subjects related to post-classical archaeologies. All publications will be fully refereed (double blind peer review) with the aim of publishing at the highest academic level and of encouraging debate. The objective is to assemble a series of volumes which reflect the changing intellectual and methodological ambitions of post-classical archaeology. PCA Studies wants also to be a useful instrument for disseminating high quality research among university students and to a wider general audience, thanks to high-quality coloured illustrations, maps and graphics.
