Arheologie experimentală: o premieră mondială

Dr. Felix Tencariu (etnoarheolog) a reușit, pentru prima dată în lume, să obțină, la capătul unei serii întregi de experimente, prima formă de sare ignigenă prin utilizarea vaselor de tip *briquetage*.

First International Congress on the Archaeology of Salt - 20-28 August 2010, Iasi, Romania

About the project

The ethnoarchaeological project on salt – a potential resource of humankind – is a worldwide field survey – the salt resource(s) from the area, the connection between that resource and their consumption, produced by the salt for the world. The project has two main research objectives: the identification of the salt sources and salt manufacturing and the subsequent ethnoarchaeological, ethnohistorical and ethnoarchaeological research projects. The research data included ethnoarchaeological, ethnohistorical and ethnoarchaeological research projects, with a focus on the identification of the salt sources and salt manufacturing and the subsequent ethnoarchaeological, ethnohistorical and ethnoarchaeological research projects. The research will contribute to ethnoarchaeology, ethnohistory and ethnoarchaeology.
